GNWPCD Commissioner Katz Visits Great Neck Synagogue

Great Neck Water Pollution Control District Commissioner Patty Katz recently visited members of the Great Neck Synagogue to discuss the numerous projects and initiatives happening at the wastewater treatment center. The presentation was part of the District's ongoing mission to provide the community with a deeper understanding of District operations through presentations and tours to local students, elected officials, environmental advocates and broader community groups.

Commissioner Katz provided attendees a look into the District's extensive cost-saving measures, current innovative services and its current infrastructure projects—including updates to the three anaerobic digesters, construction of a grease receiving station and addition of a third microturbine. The District is constantly working to find innovative ways to keep taxes low while protecting the environment for future generations.

For additional information and updates about the Great Neck Water Pollution Control District, please call the office at 516-482-0238 or visit the website at www.gnwpcd.net.

About the GNWPCD

The Great Neck Water Pollution Control District (GNWPCD) is a commissioner-run Special Improvement District within the Town of North Hempstead. The GNWPCD has provided sewage services for the Great Neck area since 1914, and currently serves more than 25,000 residents and businesses in the villages of Great Neck, Saddle Rock, Kensington, and those parts of Thomaston and Great Neck Plaza east of Middle Neck Road; as well as all unincorporated areas north of the Long Island Rail Road and a part of Manhasset. The GNWPCD's mission is to protect our bay, the environment and the health of our society.
