**New York Institute of Technology Class Visits GNWCPD**

The Great Neck Water Pollution Control District recently welcomed New York Institute of Technology professor Burton Roslyn and his environmental site planning students to District headquarters. As part of their greater learning experience, students had the opportunity to tour the wastewater treatment center which is currently undergoing a number of infrastructure projects aimed at furthering the environmental sustainability of the treatment facility for future generations.

Superintendent Christopher Murphy spoke with the students about the steps the District has taken to ensure the facility is operating to be both cost-effective for local taxpayers and environmentally friendly. The District will continue to offer this educational program to local students to showcase real-life examples of sustainable infrastructure and environmentally-conscious decision-making for the industry leaders of tomorrow.

For additional information and updates about the Great Neck Water Pollution Control District, visit the website at [www.gnwpcd.net](http://www.gnwpcd.net) to sign up for email newsletters or call the office at 516-482-0238.
